

LaserBand[®]2 Advanced Wristbands for Babies and Maternity

SEE MORE. DO MORE.

Zebra's self-laminating LaserBand[®] 2 Advanced direct print laser wristbands feature an advanced shape and design that makes assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning, while providing superior patient comfort.

Failure to correctly identify patients is one of the most serious risks to patient safety. Zebra's range of baby and maternity wristband solutions cover a wide range of requirements from those relating to patient comfort and reducing medical errors through to improving workflow and streamlining admissions processes.

Key requirements for these patients include; identifying the most tiny patients quickly and easily, providing a delicate, secure solution which is both practical and sensitive and ensuring precious newborns are correctly identified with their parents. Zebra's LaserBand products are specifically designed with these patients in mind and include the following patented elements and key features;

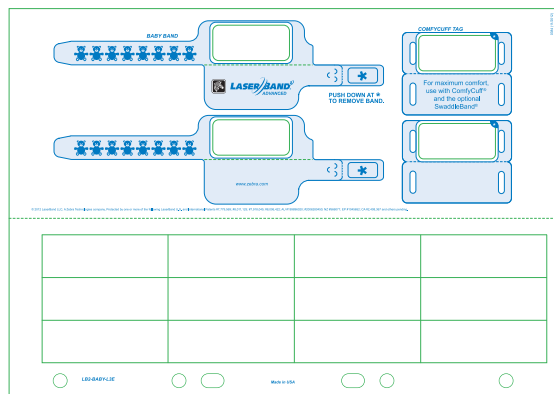

- Self-laminating seal protects the wristband from water, hand sanitiser gels and other liquids, preserving patient data and giving longer wristband usability.
- Intuitive wristband design allows for quick and easy application to the patient's wrist.
- 2 wristbands and 2 ankle ID tags on each sheet enables greater flexibility as is often required when identifying babies. Offering the ability to apply wrist and ankle identification for up to 2 babies or to enable re-banding as appropriate.
- Forms are all manufactured with adhesive-free zones around edges and holes to prevent printer jamming.
- Product materials are specifically chosen and tested for compatibility and superior performance in Laser and Inkjet printers worldwide.
- Wristbands include tamper-evident security slits to ensure wristbands cannot be removed and re-applied.
- Wristbands are available in white or red, with red wristbands typically being used as a visual alert to nursing staff, where a patient has a specific medical condition.

LASERBAND®2 ADVANCED WRISTBANDS FOR BABIES AND MATERNITY.

COMPANY

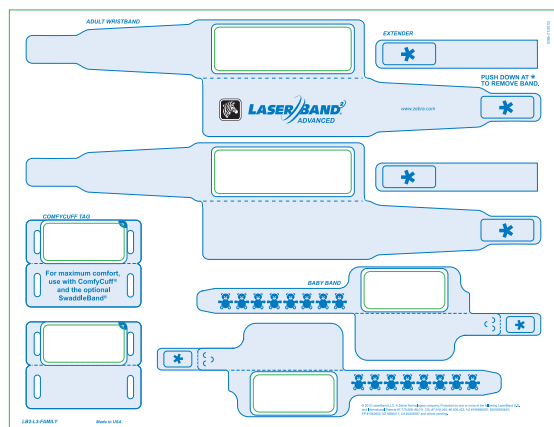

A4 sheet which contains 2 wristbands, 2 ankle ID tags and 12 chart labels.

This product has been specifically designed with babies in mind. 2 petite wristbands, 2 ankle ID tags for use with the ComfyCuff® padded cuff and 12 chart labels ensure ample identification options to cover single births, twins or re-banding requirements. This product streamlines the patient ID process and removes the need for multiple printing devices.

ComfyCuff® and Swaddle band

Complementary non-printable products for use with baby wristbands and ankle ID tags are the ComfyCuff padded cuff with velcro® fastening and the swaddle band plastic cord. ComfyCuff can be used underneath a baby wristband for added comfort, attached directly to an ankle ID tag or in combination with the swaddle band and ankle ID tag, so that a baby can remain swaddled whilst having their identity confirmed.

Family wristband sheet with 2 adult wristbands, 2 baby wristbands and 2 ankle ID tags.

This product has been specifically designed to fulfill the needs of the maternity department. Not only does it allow for babies to be identified quickly and easily, it also enables identification of parents along with their newborn baby or babies. This product is also available with a pre-printed unique reference number on each print area of the sheet. This allows for babies and parents to be identified together in cases where no hospital reference number is available for the baby at time of birth.
